

Stock # 222

Used Positive Displacement Blower, Tuthill 3210-46L2

SPECIFICATIONS

Dimensions: 25"x19"x13"

Weight: 169 Lbs. Blower Only

Blower: Tuthill

Model: 3210-46L2

Serial # 9535J96

Port Size: 3"

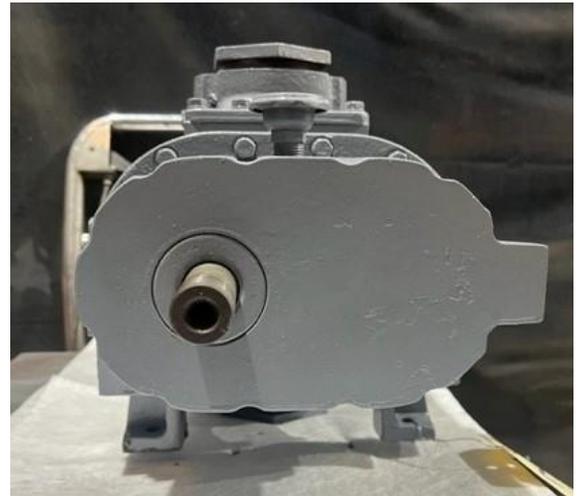

Max Pressure: 15 psi

Max Vacuum: 15" Hg

Maximum RPM: 3600

Minimum RPM: 2650

Connection: 3" FPT

PD PLUS®

High Pressure Industrial Blowers

Model 3200 Heavy Duty

Bi-directional Rotation

17 Series - Horizontal Air Flow

46 Series - Vertical Air Flow

57 Series - Horizontal Flow, Single Envelope Gas Service

81 Series - Vertical Flow, Single Envelope Gas Service

64 Series - Horizontal Flow, Double Envelope Gas Service

67 Series - Vertical Flow, Double Envelope Gas Service

Model 3200 PD PLUS heavy duty industrial blowers are designed for high performance applications, up to 15 PSI pressure or 17" Hg dry vacuum (24" Hg water injected).

17/46 Series

This series has wide application in pneumatic conveying, wastewater treatment, and the general process industry where high pressure, high volume air is required. Seal areas are vented to atmosphere to relieve process pressure against the internal lip seals, and to provide oil-free air.

57/81 Series (Single Envelope Gas Service)

This series is utilized in such applications as closed loop pneumatic conveying, process gas handling, or elevated pressure applications up to 100 PSIG discharge. Vent openings are tapped and plugged to prevent gas leakage. These fittings can also accept an inert gas purge for positive containment of the process gas.

64/67 Series (Double Envelope Gas Service)

This series is built to laboratory standards where virtually complete sealing is required. In addition to the features shown on the 57/81 series, the drive shaft is mechanically sealed and the oil sumps are plugged to provide an even higher degree of leakage protection.

Optional Cooling Coils:

All vertical flow 3200 PD PLUS models are available with cooling coils to provide cooling of lubricating oil with less than 0.5 GPM cooling water for high performance applications. Specify "W" suffix.

Model Size	Max. Press. PSI	Max. Vac. (in. Hg)	Nom. Min. RPM at Max. Disch. Pressure	Nom. Max. RPM at Max. Disch. Pressure	Displ. CFR
3202	15	15	3100	3600	.026
3204	15	15	2900	3600	.042
3206	15	15	2750	3600	.063
3210	15	15	2650	3600	.105

Material Specifications:

Housing: Cast iron

End Plates: Cast iron

End Covers: Gear end - Cast iron
Free end - Cast iron

Rotors: Ductile iron

Shafts: Ductile iron cast integrally with rotor

Bearings: Gear end - Double row ball
Free end - Single row ball
Drive shaft - Double row ball

Drive Shaft: Ductile iron

Gears: Alloy steel, helical cut

Seals: 17/46 series - Lip and labyrinth type on rotor shafts; lip seal on the drive shaft; less than 25 PSIG.

57/81 series - Mechanical and labyrinth type on rotor shafts; lip seal on the drive shaft; less than 25 PSIG

64/67 series - Same as 57/81 series plus mechanical sealing on the drive shaft; greater than 25 PSIG*

Lubrication: Oil splash system, both ends

* Blowers operating with a discharge pressure above 25 PSIG require hydrostatic testing and special high pressure seal leakage testing.

All PD Plus blowers are factory tested to meet ISO 9001 registered quality standards.

Rotors are dynamically balanced to meet ISO1940 Grade 6.3 specifications.

Performance Tables

In conjunction with our program of continuous testing and design upgrading, all specifications are subject to change without notice. All data are approximate. Request a quotation for your specific application.
