Description:

AirSep Central Oxygen Generator
Model # AS-20
Serial # AS-20-1447

? Gallon Tank
Mounted on metal skid

120V, 1.5 Amps, 60Hz

Manufacturer Description:

This central oxygen generator is designed for production and manufacturing facilities that need/consume large volumes of oxygen. It requires appropriate compressor with the adequate volume of air (SCFM) as well as holding tank (60 gallon tank supplied with generator) for the oxygen. Based on requirements and the application, a determination can be made as to the particular oxygen system needed. System is NRTL certified compliance to UL 3101.1, CSA and CE pending. Comes with 1 year warranty parts and factory labor. Allows use of 8 hoke torches or 23 little torches or 1 melting torch. The 60 gallon oxygen receiver tank measures 52" x 24" . Unit measures 57"H x 13"W x 11"D
