**Description:**

AirSep Central Oxygen Generator

Model # AS-20

Serial # AS-20-1447

Vertical Air Tank

Mounted on metal skid

120V, 1.5 Amps, 60Hz

**Manufacturer Description:**

This central oxygen generator is designed for production and manufacturing facilities that need/consume large volumes of oxygen. It requires appropriate compressor with the adequate volume of air (SCFM) as well as holding tank (60-gallon tank supplied with generator) for the oxygen. Based on requirements and the application, a determination can be made as to the particular oxygen system needed. System is NRTL certified compliance to UL 3101.1, CSA and CE pending. Comes with 1 year warranty parts and factory labor. Allows use of 8 hoke torches or 23 little torches or 1 melting torch. The 60-gallon oxygen receiver tank measures 52" x 24". Unit measures 57"H x 13"W x 11"D
